

009: AM Time; PM Time

Learning equivalent AM and PM times

Starting Session

The Miniland clock displays the time in AM and PM times. Explain the Miniland clock and the difference between AM and PM times.

Miniland Product Game

Hand out a sheet (printed out beforehand) to each player. Set a time on the Miniland clock and each player writes that time in AM and PM format. You should remember that the Miniland clock helps us with equivalents. You can repeat this activity throughout the week with different times.

Digital Game

When finished, play the digital game to reinforce content. The aim is to place the digital time displayed on the Miniland analogue clock. Place the AM time on the red clock and the PM time on the green clock. The game ends when all 24 hours have been placed.

Educational Content

Mathematics

Reading analogue and digital clocks
Units of time measurement
AM and PM equivalents

Language

Vocabulary

TIC

Use of a digital environment
